NEW

Compact, Lightweight, 12× Zoom!

10.0 Megapixels

12x Optical Zoom

2.7-Inch LCD

World's Smallest 10.0-Megapixel 12x Long Zoom Digital Camera*

The FinePix S1000fd is the world's smallest 10.0-megapixel long zoom digital camera, packed with high-performance features including 12x optical zoom lens, large 2.7-inch LCD and a host of versatile shooting functions. Sized to fit in your palm, the FinePix S1000fd lets you shoot beautiful, high-resolution photos with ease. *As of January 2008; Fujifilm data

FINEPIX S1000 *fd*

Dynamic Image Compact

12x Optical Zoom

FinePix S1000fd's 12x optical zoom lens expands your shooting reach, covering a remarkable focal range of 33-396mm*, bringing you close enough to capture subtle expressions. And the single built-in lens means you're always ready to shoot, with no need for bulky extra lenses or time-consuming lens changes. *35mm equivalent

PS(Picture Stabilization) Mode

No more worry about blur from camera shake, even when shooting at maximum zoom range! Picture Stabilization mode automatically sets the optimum shutter speed and sensitivity for each scene, preventing blur from camera shake or fast-moving subjects, even in low-light situations.

FinePix S1000fd

Super Macro

Super Macro mode lets you move in as close as approx. 2cm (0.8 inch) making it easy to take high-impact full-frame close-ups.

Super Macro

Beautiful Photo Compact

10.0 Megapixels

Boasting a 10.0-megapixel CCD sensor, the FinePix S1000fd delivers high image quality that promises sharper, more brilliant, high-resolution pictures whatever the scene.

High Sensitivity

With a maximum sensitivity of ISO 3200*, scenes shot in low light appear more true to life. And high sensitivity means you can capture impressive stop-action images, even when the subject is moving at high speeds.

*At ISO 3200, resolution is limited to a maximum 3 megapixels. At full resolution (10 megapixels), sensitivity is limited to a maximum ISO 1600.

FINEPIX S1000

As-You-Like-It Compact

NEW Panorama Mode

The new Panorama Shooting Mode* makes it easy to create impressive panoramic photos. This mode captures and combines max 3 consecutive shots, which are saved to the memory card as a panoramic picture.

*Use a tripod or monopod for best results. Only the panoramic picture is saved; individual photos are not. Picture size is 3M. Exposure and white balance are set with the first picture and flash is suppressed.

Face Detection

Software-based Face Detection instantly identifies faces in the scene and automatically adjusts focus and exposure to ensure beautiful people pictures. Operating throughout the entire range of the 12x zoom lens, Face Detection can detect up to 6 faces at a time.

Red-Eye Removal

The FinePix S1000fd automatically detects and corrects unsightly red-eye reflections that often spoil flash photos of people.

Versatile Shooting Modes

A selection of tailored shooting modes provide ideal settings for everything from shutter speed and exposure to white balance. An intuitive interface lets you confirm settings on the LCD and provides brief text explanations that take the guesswork out of digital photography.

Mode Dial

Long-Lasting Battery Power

Powered by alkaline batteries (included), the FinePix S1000fd delivers approx. 300 shots.

Big-Screen Compact

2.7-inch LCD

A large, high resolution LCD with 230,000-dot resolution makes it easy to compose great shots and to see photo details when you play back captured images.

Micro Thumbnail View

The high-resolution LCD can display up to 100 picture images simultaneously in 10x10 array. Use this micro thumbnail view to instantly select specific photos to view or print.

Additional Features

•xD/SD-Compatible

Compatibility with both xD Picture Card and SD/SDHC memory cards gives you added flexibility for recording, transfer and playback of photo images.

•Movie recording with sound

•Electronic viewfinder with accurate color reproduction
